MPEG Streamclip: video converter for Mac & Windows

MPEG Streamclip is a powerful free video converter, player, editor for Mac and Windows. It can play many movie files, not only MPEGs; it can convert MPEG files between muxed/demuxed formats for authoring; it can encode movies to many formats, including iPod; it can cut, trim and join movies. MPEG Streamclip can also download videos from YouTube and Google by entering the page URL.

You can use MPEG Streamclip to open and play most movie formats including MPEG files or transport streams; edit them with Cut, Copy, Paste, and Trim; set In/Out points and convert them into muxed or demuxed files, or export them to QuickTime, AVI, DV and MPEG-4 files with more than professional quality, so you can easily import them in a DVD authoring tool, and use them with many other applications or devices.

Supported input formats: MPEG, VOB, PS, M2P, MOD, VRO, DAT, MOV, DV, AVI, MP4, TS, M2T, MMV, REC, VID, AVR, M2V, M1V, MPV, AIFF, M1A, MP2, MPA, AC3, ...

2: Download Mpeg Stream Clip Video Converter either for Windows or Mac and install onto your computer.

3: When installation is complete, open the software and a window will appear

4: Drag your video file onto the Blue dots inside the square and your video file will appear.

5: When your Pitch has loaded, click on File (next to MPEG Streamclip) and select Quicktime – a new window will appear (see below). At this point you can adjust the quality of the file at the top and this in turn will reduce the file size. You may need to play around with the quality.

6: Select Make Movie and the Pitch will save to a destination of your choice.
